A New Study Shows

Prevent Future Injury!

A number of compelling workers compensation studies have shown that Chiropractic Care really works, costs less, reduces time away from work and can eliminate the dangers of drugs and surgery.

These exciting studies send one clear message to everyone, if you are suffering from a musculoskeletal injury, a recent whiplash, or work injury, Chiropractic Care is a very effective and affordable method of natural healing.

Get lasting relief from your nagging aches, chronic pain, numbness, tightness and joint stiffness!

The Bureau of Labor Statistic reported that sprains and strains account for the highest frequency of all occupational injuries in the United States.

The risk factors that can cause or aggravate musculoskeletal disorders include repetitive motion forceful exertions, lack of exercise and poor posture. Low back disorders are the most common complaint among workers.

Musculoskeletal disorders can occur when your spine is out of alignment and when muscles or tendons are stretched or over-used beyond their capabilities. These injuries often respond remarkably well to Chiropractic Care.

A new study published in the April 2011 issue of The Journal of Occupational and Environmental Medicine was conducted by medical and other healthcare professionals outside of the Chiropractic profession. Researchers followed 894 workers' compensation cases involving low-back pain for a period of one full year. The study concluded that when compared to treatment by physical therapists and MD's, patients treated by Chiropractors had better outcomes, lower medical expenses, fewer surgeries, fewer disability recurrences and shorter periods of disability.

Chiropractic Maintenance Helps

Pre-

Do you have breathing issues, lung congestion, chest heaviness or fatigue?

Oxy Power by Chi Health, is an herbal formula developed by Dr. Chi that is effective for lung congestion, and has an anti-fatigue function. It increases the oxygen carrying capacity of the red blood cells by six times. Those who have chest heaviness, who smoke, or have been exposed to smoke will benefit from Oxy Power.

Oxy Power has been shown to

1. Relax the bronchial muscle
2. Exhibit a marked expectorant action
3. Relieve inflammation of the bronchial mucosa
4. Be useful for asthma and bronchial illnesses
5. Enhance immune function
6. Repair and protect DNA.

Oxy Power works at the mitochondrial level so it has more lasting effect in increasing energy than coffee or an energy drink. It is extremely beneficial not only for patients with fatigue, anemia and cancer, but for athletes as well. It has no steroids, narcotics, beta blockers, stimulants or diuretics. Since Oxy Power both repairs DNA and improves mitochondrial function it provides anti-aging benefits and protections for cardiovascular function.
